

A stripped-down set of useful teaching & learning iPad apps for older iPads.

Many schools have older iPad 2 devices that will still function, despite the devices being over ten years old. There are not many apps that will run on such devices – yet the below currently will.

Many schools choose to deploy such iPads to younger year groups, especially EYFS, as occasional, useful devices. Be aware that you may wish to limit the access children have to such devices, and include the apps as part of structured learning activities, rather than free choice.

NB: App labelled King of Maths, above, is **King of Maths Junior**.  
 3<sup>rd</sup> row down: **NumberLine Galaxy Lite**
